ABOUT US

The **COS.M.I. S.R.L.** is the realization of a dream and is born from enthusiasm of the holder that has put to fruit his **experience matured in the years**, realizing works and plants in the oils, steels, thermoelectrics, hydroelectrics and civilians areas.

Up to the moment of the great jump. As it often happens, starting from the experience of job to adapt to a **world that quickly changes**.

So, the COS.M.I. S.R.L. today is a reference point in national and european market for the realization of industrial plants, especially in the specific one, in the mechanics erections, pipings, carpentries, approaching the characteristics of competitiveness and production typical of the industrial world with the care and attention of artisan wisdom of a time, but also with the **maximum employment of the most advanced technology** and **qualified staff** to get lasting results in time and able of high performances.

MISSION

Our projects are studied to allow the **best return of investment** in technology according to standard established with the customer.

We form the staff with projects for continuous improvement, spread to all business levels the attachment to the company and the pride to belong to a **winning team**.

The **safety in the work places** where we operate, is the primary objective of the company.

In 2008 were started formation projects to all business levels and a check up to a verify the application of the safety standard conforming to the last laws.

WORKS

OIL DINAMIC FLUSHING

Flushing of oil dinamic piping by means of a 1200 Lt./minute supply station and oil analysis with a double laser particle counter with on-line reading, with analysis result certified according to NAS 1638 and ISO 4406 standards.

WORKS

MECHANICAL ASSEMBLY

State-of-art instruments come together with the great know-how of the personnel for assembling production lines in the steel, hydroelectric and paper sectors

WORKS

INDUSTRIAL MAINTENANCE

Creation of industrial mechanical maintenance, such as planned, emergency service, maintenance engineering with improved performance projects and better plant usage rate

WORKS

PIPES FOR FLUIDS

Manufacture of any type of pipe for fluids (oleo-dynamic, gas, air, nitrogen, water, etc.) with qualified welders according to UNI-EN and ASME regulations. PP-H and PVDF piping for plants using high corrosive fluids such as sulphuric acid, made by expert technicians and specialized welders with the help of state-of-art equipment.
